12	12	13	14	15	16	17	18	19	20	21	22	23	24

(any number) + 0 = (same number)

(any number) + 1 = (the next number)

(any number) + (same number) = (the number doubled)

9 wants to be 10 so badly it takes one away from the other number  $(9 + 7) = (10 + 6) = 16$

8 wants to be 10 so badly it takes two away from the other number  $(8 + 6) = (10 + 4) = 14$
